Professional Summary

Full Stack Developer with freelance and internship experience building MERN applications and REST APIs. Skilled in React.js, Node.js, Express.js, MongoDB, and JavaScript, with hands-on experience in authentication, RBAC, API integration, and performance optimization. Focused on building scalable, clean, and user-friendly web applications.

Education

DIT University, Dehradun 2023 – 2027
Bachelor of Technology in Computer Science Engineering

Technical Skills

Languages: Java, JavaScript, HTML, CSS
Frontend: React.js, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, Mongoose
Authentication/Security: JWT, Bcrypt, RBAC
Tools & Platforms: Git, GitHub, Postman, VS Code, MongoDB Compass, Shopify
Deployment: Vercel, Netlify, Cloudflare
Core Concepts: Data Structures and Algorithms

Experience

Freelance Full Stack & Shopify Developer Dec 2025 – Present
Self-Employed (Upwork & Direct Clients)

- Developed and deployed scalable MERN stack web applications using React.js, Node.js, Express.js, and MongoDB
- Built and customized Shopify themes using Liquid, HTML, CSS, and JavaScript for eCommerce clients
- Integrated third-party APIs, payment gateways, and authentication systems to enhance platform functionality
- Optimized website performance and improved load times through backend architecture improvements and efficient database design

Software Development Engineer Intern Dec 2025 – Jan 2026
Bluestock Fintech

- Developed backend REST APIs using Node.js and Express.js for fintech application modules
- Implemented secure authentication and role-based access control (RBAC) mechanisms
- Worked with MongoDB for efficient data modeling and query optimization
- Collaborated with frontend developers to integrate APIs and improve system performance

Projects

Jobrix – Internal Hiring ATS (Ongoing) | *React.js, Node.js, Express.js, MongoDB, AI APIs* 2026 – Present

- Developing a full-stack Applicant Tracking System (ATS) to streamline internal recruitment workflows
- Implemented job requisition management, candidate tracking, and AI-based resume parsing and screening
- Designed secure authentication and Role-Based Access Control (RBAC) system
- Built scalable REST APIs and optimized database schema for efficient candidate data handling

Responsive Web Portfolio | *React.js, Tailwind CSS, Framer Motion* July 2025 – Feb 2026

- Developed a responsive and performance-optimized portfolio website using React and Tailwind CSS
- Improved page load speed by 40% and achieved 95% Lighthouse performance score through optimization techniques
- Implemented animated UI components using Framer Motion and integrated EmailJS for contact automation
- Deployed using modern build tooling (Vite) with SEO-friendly structure and optimized asset loading

Achievements / Certifications

- Solved 200+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
- Active GitHub contributor with 400+ contributions across full-stack projects and backend implementations.
