EDUCATION

DIT University, Dehradun

Bachelor of Technology in Computer Science Engineering

2023 – 2027

CGPA: 7.88

EXPERIENCE

Freelance Full Stack & Shopify Developer

Dec 2025 – Present

Self-Employed (Upwork & Direct Clients)

- Developed and deployed scalable MERN stack web applications using React.js, Node.js, Express.js, and MongoDB
- Built and customized Shopify themes using Liquid, HTML, CSS, and JavaScript for eCommerce clients
- Integrated third-party APIs, payment gateways, and authentication systems to enhance platform functionality
- Optimized website performance and improved load times through backend architecture improvements and efficient database design

Software Development Engineer Intern

Dec 2025 – Jan 2026

Bluestock Fintech

- Developed backend REST APIs using Node.js and Express.js for fintech application modules
- Implemented secure authentication and role-based access control (RBAC) mechanisms
- Worked with MongoDB for efficient data modeling and query optimization
- Collaborated with frontend developers to integrate APIs and improve system performance

Web Development Intern

Nov 2025 – Feb 2026

The Developers Arena

- Built full-stack web applications using React.js and Node.js during a 3-month internship program
- Implemented responsive UI components and backend APIs following MVC architecture
- Worked on real-world project deployment and performance optimization

PROJECTS

Jobrix – Internal Hiring ATS (Ongoing) | React.js, Node.js, Express.js, MongoDB, AI APIs

2026 – Present

- Developing a full-stack Applicant Tracking System (ATS) to streamline internal recruitment workflows
- Implemented job requisition management, candidate tracking, and AI-based resume parsing and screening
- Designed secure authentication and Role-Based Access Control (RBAC) system
- Built scalable REST APIs and optimized database schema for efficient candidate data handling

Responsive Web Portfolio | React.js, Tailwind CSS, Framer Motion

July 2025 – Feb 2026

- Developed a responsive and performance-optimized portfolio website using React and Tailwind CSS
- Improved page load speed by 40% and achieved 95% Lighthouse performance score through optimization techniques
- Implemented animated UI components using Framer Motion and integrated EmailJS for contact automation
- Deployed using modern build tooling (Vite) with SEO-friendly structure and optimized asset loading

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML, CSS

Frontend: React.js, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Mongoose

Tools & Platforms: Git, GitHub, Postman, VS Code, MongoDB Compass, Shopify

Deployment: Vercel, Netlify, Cloudflare

Core Concepts: Data Structures and Algorithms, OOP, System Design, Authentication
